

Enhance agility with Power Platform

POWER PLATFORM | **2022 RELEASE WAVE 2**

Releasing from **OCTOBER** 2022 through **MARCH** 2023

POWER BI

POWER APPS

POWER PAGES

POWER AUTOMATE

POWER VIRTUAL
AGENTS

AI BUILDER

DATAVERSE

POWER BI | 2022 WAVE 2 RELEASE PLAN

Power BI continues to invest in empowering every individual, team, and organization to drive a data culture.

CREATION EXPERIENCE

Aligning experiences with Office and enabling datasets authoring on the web.

POWER QUERY DIAGRAM

Creators can use a no code experience to perform ETL on their data.

POWER BI | **2022 WAVE 2 RELEASE PLAN**

Power BI continues to invest in empowering every individual, team, and organization to drive a data culture.

MICROSOFT TEAMS

Enhancements to Metrics focused on enterprise needs and integration with Viva Goals.

BIG DATA EXPERIENCE

Automatic aggregations, query scale out, data protection capabilities through DLP and providing improved visibility into activity to admins

POWER BI | **PREMIUM X PRO**

PRO

Power BI Pro helps organizations create a data culture by empowering every team and individual to discover and collaborate on insights.

POWER BI | **PREMIUM X PRO**

PREMIUM

With each release, Microsoft Power BI Premium continues to deliver features that help organizations accelerate the delivery of insights at scale, meeting the most demanding needs of an enterprise.

Flexible licensing models

Microsoft owned resource management

Autoscale and pay-as-you-go pricing

Advanced self-service data prep

Interactive experiences over big data

POWER BI | **PREMIUM X PRO**

PREMIUM

With each release, Microsoft Power BI Premium continues to deliver features that help organizations accelerate the delivery of insights at scale, meeting the most demanding needs of an enterprise.

Operational reporting and distribution

Advanced Security

Power BI 2022 Release Wave 2 highlights

POWER BI PREMIUM | DLP POLICIES

BUSINESS VALUE

This feature enables organizations to control and protect their sensitive enterprise data by leveraging Microsoft's leading security solutions for information protection, threat protection, and cloud app security.

FEATURE DETAILS

Microsoft 365 Data Loss Prevention (DLP) policies enable enterprise customers to implement policies for Office, Teams, SharePoint, and more.

The preview includes the ability to detect upload of models that contain sensitive info types (both out-of-the box and custom types) and/or that are labeled with specified sensitivity labels, along with automatic admin actions, such as alerts to security admins and custom policy tips for users.

POWER BI PRO | **SDK TO ENABLE QUICK CREATE**

BUSINESS VALUE

Power BI is making available an SDK to add Power BI quick create experiences within thirdparty offerings. Developers can add a new capability to their product that helps users of their product get started with data analysis in Power BI on data from their application.

FEATURE DETAILS

Developers will be able to embed a quick create report experience in their application that connects the data to Power BI, and it automatically generates a basic Power BI report for that data.

POWER APPS | 2022 WAVE 2 RELEASE PLAN

Industry-leading low-code application development platform that underpins Dynamics 365 extensibility. Use Power Apps to decrease cost, complexity and time of software development.

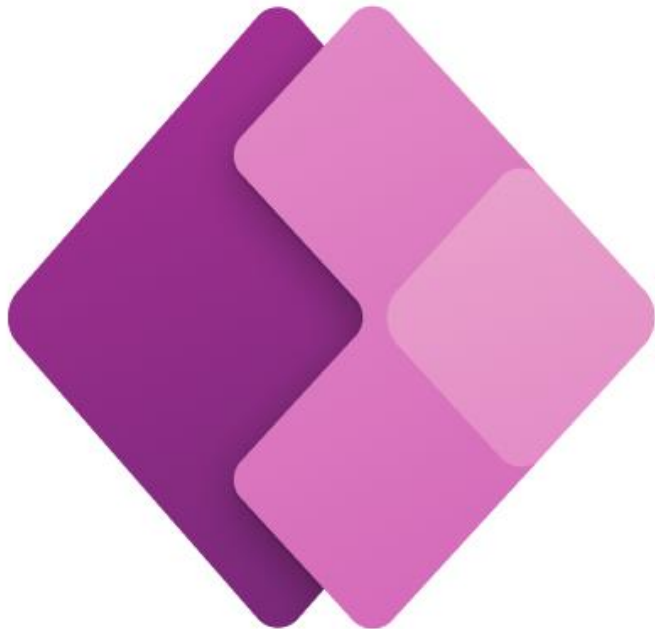

TRUST

Secure and governable enterprise apps are critical to creating trust with your users and enterprise IT teams

DATA

Expand governance capabilities and allow makers and developers of all skill levels will be more productive over Microsoft Dataverse in a unified studio.

POWER APPS | **2022 WAVE 2 RELEASE PLAN**

Industry-leading low-code application development platform that underpins Dynamics 365 extensibility. Use Power Apps to decrease cost, complexity and time of software development.

FUSION

Increasing collaboration with Microsoft 365 integration, allowing users to collaborate and act on key data, as well as UX modernization.

INTELLIGENCE

Organizations can now build and deliver flagship apps to the entire company through Power Apps with offline and standalone apps.

Power Apps 2022 Release Wave 2 highlights

POWER APPS | MODERN ADVANCED FIND

BUSINESS VALUE

With modern advanced find, you can access any table in a model-driven app through search and use advanced filters to explore the data easily. Be more productive with navigation by searching for a view by its name in the enhanced view selector. The new view management experience will provide you with options to share views so you can collaborate with your team easily. Managing views is simpler with personalization options to build your own set of views.

POWER APPS | **POWER BI QUICK REPORTS**

BUSINESS VALUE

Create reports in the Power BI service starting with a view in a model-driven app. Power BI automatically generates the visuals for you, so you can start exploring the data with just a few clicks.

NOW YOU CAN

- Create a Power BI quick report, starting from a view with just one button-click. The Power BI service generates visuals and a layout intelligently based on the underlying data.
- Make any necessary modifications to visuals or the filters or the columns (or any combination of all three) using the display name of the columns on the quick report.
- Save the Power BI report to a workspace of your choice, so you can access it anytime and customize it for your needs.

POWER PAGES | 2022 WAVE 2 RELEASE PLAN

Goodbye Power Portals, hello Power Pages!

Power Pages have been rebranded and will improve its low code capabilities, focusing in enable a low-code maker or a professional develop to rapidly design, configure, and publish websites.

HOME

Now providing a single view of all your websites in an environment and allows you to create additional sites using the available templates

TEMPLATE HUB AND PREBUILT TEMPLATES

The template hub provides a set of predefined industry-specific and cross-industry website patterns available to makers when creating new sites

POWER PAGES | 2022 WAVE 2 RELEASE PLAN

Goodbye Power Portals, hello Power Pages!

Power Pages have been rebranded and will improve its low code capabilities, focusing in enable a low-code maker or a professional develop to rapidly design, configure, and publish websites.

ADMINISTRATION AND GOVERNANCE

View website details, consumptions reports, and other site information from the Power Platform admin center.

Self-service diagnostic tools, such as the portal checker to identify and resolve common issues in websites

Configure integration with other services (SharePoint and Power BI), restrict access by IP address

POWER PAGES | 2022 WAVE 2 RELEASE PLAN

Goodbye Power Portals, hello Power Pages!

Power Pages have been rebranded and will improve its low code capabilities, focusing in enable a low-code maker or a professional develop to rapidly design, configure, and publish websites.

PROFESSIONAL DEVELOPER EXPERIENCES

Tooling support for development like Visual Studio Code extensions and CI/CD support using Azure Devops and GitHub actions

Application lifecycle management capabilities

Extensibility patterns allowing developers to extend the websites form complex business requirements

Power Pages 2022 Release Wave 2 highlights

POWER PAGES | **USE WAF FOR WEBSITES**

BUSINESS VALUE

This feature will provide admins with the capability to enable a preconfigured web application firewall (WAF) for their websites. This WAF would be managed by Microsoft and will come with a preconfigured set of rules against common top Open Web Application Security Product (OWASP) vulnerabilities like cross site scripting (XSS) or SQL injections.

FEATURE DETAILS

Web application firewalls help safeguard your websites from network attacks and common web vulnerabilities and exploits like SQL injections or cross site scripting (XSS). With this capability, admins would be able to enable WAF for any of their websites or even enable it by default for all the websites in a tenant

POWER AUTOMATE | **2022 WAVE 2 RELEASE PLAN**

Power Automate is more accessible than ever with new experiences to help users of every skill level build out their cloud and desktop flows

AUTOMATION FOR EVERYONE

Features that will make easier to get started with automation through any application that you use in Windows or Microsoft 365.

HYPERSCALE CLOUD RPA

Everyone is increasing the scale of their RPA deployments. New features to make it easier to manage your machines and the credentials for your users and accounts in Azure

POWER AUTOMATE | **2022 WAVE 2 RELEASE PLAN**

Power Automate is more accessible than ever with new experiences to help users of every skill level build out their cloud and desktop flows

SET IT AND FORGET IT

Fundamentally, the service must never go down. Improvements to a more reliable and consumable platform.

ANYONE CAN GET STARTED

Anyone can automate a process. In addition to relevant first-run experiences, more intelligence is being added to make it easier to process even complex documents.

POWER AUTOMATE | **2022 WAVE 2 RELEASE PLAN**

CLOUD FLOWS

New features focused in making it easier to build and share automations, help organizations drive adoption with confidence through deeper governance and privacy controls

DESKTOP FLOWS (RPA)

- Drive adoption within large and small enterprises, delivering features that enable organizations to deploy their automations at scale
- Provide citizen developers with delightful first run experiences with high ease of use and fast access to hosted resources to build or run their automations
- Enable ISV integrations, opening new options for partners to build RPA solutions based on desktop flows decoupled from cloud flows.

Power Automate 2022 Release Wave 2 highlights

POWER AUTOMATE | **USE AI TO HELP CREATE CLOUD FLOWS**

BUSINESS VALUE

Easily get started building new cloud flows by just describing them in natural language.

FEATURE DETAILS

Write exactly how you want your flow to be built in natural language and a flow that corresponds to the request will be instantly created.

POWER AUTOMATE | NEW ODATA EDITOR

BUSINESS VALUE

This feature provides easier filtering in actions like the SharePoint Get Items action that previously required OData syntax.

The screenshot shows the 'Get items' action configuration in Power Automate. The 'Site Address' is set to 'Power Automate Partners' and the 'List Name' is 'AI Builder opportunity tracker'. The 'Filter Query' section is expanded, showing a logical filter with two conditions connected by 'And':

- Condition 1: ☐ Date
- Condition 2: ☐ Title

Below the conditions is a '+ Add' button to add more filters.

POWER AUTOMATE | RUN HOSTED RPA BOTS

BUSINESS VALUE

Users can quickly and easily run desktop flows using fully managed virtual machines. This feature also allows customers to dynamically scale up and down the virtual machine used to run their automation.

FEATURE DETAILS

Power Automate Desktop is taking the next step in a journey with hosted RPA bots. As a true software as a service (SaaS) for RPA, unattended RPA bots can now be created and automatically scaled across hosted virtual machines powered by Microsoft Azure.

POWER AUTOMATE | **AZURE KEY VAULT IN RPA**

BUSINESS VALUE

Users can leverage credentials from Azure Key Vault to connect to Windows sessions on desktop flow machines. This feature supports rotating passwords without the need to update the connection.

FEATURE DETAILS

With this feature, users can have their desktop flows run on Windows machines logged in with credentials from Azure Key Vault. The Windows machine retrieves the latest credentials at runtime. This enables desktop flows to keep running successfully even when the administrator changes the password.

POWER VIRTUAL AGENTS | **2022 WAVE 2 RELEASE PLAN**

LOW-CODE CUSTOM BOTS

Empowers any company to decrease development costs developing chatbots, using a easy code-free graphical interface, taking out the complexity of developing a chatbot.

Now with Power Pages integration, DLP options, improvements to Microsoft Teams integration and more!

CORE AUTHORIZING

New features are available to the no-code authoring canvas. Manage the way your topics Interact, control how you want the conversation to flow and how a conversation should feel like.

Power Virtual Agents 2022 Release Wave 2 highlights

POWER VIRTUAL AGENTS | **NOTIFY TEAMS USERS**

BUSINESS VALUE

Let your bot reach users proactively by notifying them when a time-off request is approved or send reminders for daily health check-ins.

FEATURE DETAILS

In the past a user must ask a bot:

“Has my budget been approved?”

And the answer could be “Not yet”

Now instead of the user having to ask the question again Every day, a Power Automate flow can be created integrated with Power Virtual Agents that will respond soon as that answer have changed

AI BUILDER | 2022 WAVE 2 RELEASE PLAN

INTELLIGENT APPS AND WORKFLOWS

Lifecycle and governance of AI Builder models will be improved with enhanced versioning, Deployment and monitoring capabilities.

INTELLIGENT DOCUMENT PROCESSING

- Enhanced performance of table extraction spanning across multiple pages for structured documents
- Document classification
- Identifying personally identifiable information
- Detecting signatures

AI Builder 2022 Release Wave 2 highlights

AI BUILDER | DETECT SIGNATURES

BUSINESS VALUE

Many documents in the enterprise require proof of signature. The signature detection feature enables the automation of a broader set of document-based processes that require signatures.

FEATURE DETAILS

After training your AI, it will be able to recognize the signature in a specific location in the document.

MICROSOFT DATAVERSE | **2022 WAVE 2 RELEASE PLAN**

AZURE SYNAPSE

Microsoft Dataverse continues investment in Azure Synapse Link. Customers will be able to unlock deeper insights from Dataverse data using the power of Azure Synapse.

AZURE ACTIVE DIRECTORY

Deeper integration with Azure Active Directory will simplify sharing while improving governance and security.

DATA MODELING

Enhancements to Dataverse data modeling will allow customers to build new types of applications leveraging rich and intelligent data types.

Microsoft Dataverse 2022 Release Wave 2 highlights

MICROSOFT DATAVERSE | **RESTRICT IP**

BUSINESS VALUE

As an administrator, you'll be able to restrict unauthorized access to your Dataverse APIs from IP ranges outside of your configured business ecosystem.

FEATURE DETAILS

IP firewall analyzes and enforces the IP address of each request in real time. For example, consider if the IP firewall is turned on in a Dataverse environment, and IP ranges are set with the IP address of the office location. When a user decides to access the resources from another location (for example, a coffee shop), Dataverse will deny access to resources in real time.
